

Introducing Variable™ Plus

Varier®

Our homes used to be divided into rooms with specified functions. Today, life at home is becoming increasingly fluid. Our homes are no longer just sanctuaries where we can retreat and relax, but for so many of us they have also become our place of work. As the personal meets the professional, new needs arise, placing new demands on our homes and how we furnish them. This behavioral shift has brought on a growing need for versatile and dynamic furniture that suits the combined demands of both leisure and work. With its iconic design and outstanding ergonomic qualities Variable™ is as relevant as ever.

In close collaboration with designer Peter Opsvik and balans© concept founder Hans Chr. Mengshoel, we are proud to introduce Variable™ Plus.

An iconic design with unparalleled ergonomic qualities. Expand your sitting options with Variable™ Plus.

Variable™ Plus is an advancement of the iconic Variable™. Featuring a fixed backrest with an ergonomic upholstered cushion, the chair allows for a wide range of possible sitting positions, while still providing the unparalleled functionality of the original kneeling chair.

The cushioned backrest allows you to lean back and stretch out. The curvature of the wooden runners is optimized, ensuring that finding and holding a balanced position on Variable™ Plus is both effortless and intuitive.

Variable™ Plus is available in a natural or black finish, and a wide range of upholstery fabrics and colors. The wooden runners are made from layers of beech and ash veneer .

Perfecting the curve

The curvature of the wooden runners has been optimized, making it easier to find and hold a balanced position. This is a slight adjustment, with a big impact on the sitting experience. While previous models could evoke the sensation of being pushed forward, Variable™ Plus has been developed to ensure a sitting experience that feels balanced at all times.

Unconditional support

A solid metal bracket with a new and improved butterfly fixture, ensures stability and comfortable support for all kinds of moves. The sculpted foam cushion is curved to follow the shape of the body, allowing one to move freely from side to side, yet still providing support when leaning back.

The ultimate home office chair. Shown here in black lacquered ash upholstered in Re-wool 758 from Kvadrat.

The optimized curve of the runners effectively eliminates any unwanted pressure on the shins when in the kneeling position.
