

Wing

Combining movement with mobility

Design: Peter Opsvik

Concept

A natural upright posture helps strengthen your core

Your abdomen and back muscles work to keep your posture upright

Adjust the height of the seat to suit, and roll on the wheels

The open angle between your upper and lower body aids blood circulation

Category

Variation makes life exciting. On a Varier kneel chair, your body is constantly in motion. Place your knees on, in front of, between or beside the shin pads to vary your sitting angle and posture, and find the ideal balance point for your body. Have you noticed that all of the seats on our kneel chairs lean downward? This tilts the pelvis forward and puts the spine in the same position as when you are standing. This means no pressure on spinal discs and relief from shoulder and back tensions. Just remember to place your weight on your bottom when sitting, and on your shins when varying your positions. You'll never want to go back to your old way of sitting.

Healthy sitting

- Promotes natural, upright posture
- Reduces pressure on vertebral disks
- Keeps spine in upright position
- Strengthens core and abdominal muscles
- Prevents tension in neck and shoulders
- Promote deep breathing

varier®

Benefits

Kneeling Office chair with castors

- Benefits of a kneeling chair
- Office friendly features
- Optimal for work at higher tables

Tilted seat with rubber dampener

- Gently tilts the pelvis forward and encourages an upright spine
- Open angle between upper and lower body
- Supports deep breathing and improves circulation during work
- Strengthens cores muscles and prevents tension in neck and shoulders
